

There are some beautiful beaches in the world that have hidden dangers. When water floods sand below the surface, the sand particles get pushed apart. The result is a muddy mixture of the two that can't support the weight of a person. When someone walks over it, they sink down.

It's a trap known as quicksand. As the person sinks down, it pushes the water out creating a vacuum effect that secures its victim tighter and tighter.

Sometimes it only takes moments to absorb someone into a desperate situation.

This is what pornography does to millions every day. It starts simple enough without any sign of danger, a movie on cable or the click of the mouse.

We tell ourselves there's nothing wrong with it, or perhaps it's not that bad, even though we keep it secret.

Pretty soon what started as "controllable" and "here and there" turns into a habit, deeper and deeper. But the user is not the only one affected. The consequences for our society as a whole is alarming.

Knowing the dangers and taking them seriously will allow us to avoid getting ensnared. The fate of the next generation depends on us.

Pornography the silent killer....set for Jesus

Do you think it is possible for one to stop watching pornography and masturbating after being involved in it for 10 years?

Hmmmm, I asked him...do you know that even if the devil chooses to repent today, God will forgive him? He wondered and was surprised of what I said. Seeing that the devil has been against God and that both can never come together.

I said to him.... How deep you are into something does not determine whether you'll come out of it or not... You just need to make the decision because you have a choice, work towards it with determination and make sure you have a stronger power backing you up.

Same with pornography and masturbation, no matter how deep you are into it if you want to come out of it, you just need to be honest, make the choice of leaving, be determined and make sure you have God backing you up and the end result will be freedom from pornography and masturbation.

Sometimes your depth in pornography and masturbation makes you see some possibilities as impossible. I'll explain to you in season 33 why I said you must acknowledge it's a sin, be honest, confess, be determined in overcoming it, and have the backing of God.

He sighed and said... Your depth in pornography and masturbation does not determine whether you'll stay in it or come out of it, you just need to make the choice and follow the way. He left, thinking about..... Pornography the silent killer..... Set for Jesus.

There are films I watch this day that creates urges that is similar to that of the time I still feed on pornography. These are not pornography films but it's just that they kiss and have sex but they don't show everything like that of pornography.

Please Help me set for Jesus, I fear that I might go back to my irritating past of watching pornography and masturbating. It's alright, no need to be anxious, just calm and listen attentively. Firstly, I must let you know that there is nothing new under the sun.

The truth is there is 90% possibility that you return to your irritating past of feeding on Pornography and masturbating if you continue watching these films.

Pornography contents are now becoming public, public in the sense that; Adverts on TV and 70% of online platforms have pornography contents especially in films where you see young adults and teenagers kissing, romancing and even having sex.

They might look like it means nothing but as you watch it, it's creating something in you that will one day be unleashed whether you like it or not, this is one of the things that causes unwanted pregnancy among teenagers in school.

These are not things someone told me but I saw myself through experience and research combined.

It's a choice to either continue watching those films or not but if you know you don't want to back to your irritating past of feeding on pornography and masturbating, you have to let those films go, it's called sacrifice.

To abstain totally from pornography and masturbating you must be ready to pay the price of sacrifice.

Pornography the silent killer..... Set for Jesus

Its been over 10 years now since I set my eyes on pornography, I don't watch pornography again.

We are really far apart. And I was led to ask him... have you read any book before that makes you feel aroused, equated to that of pornography?

He said yes, I just started reading the book yesterday and whenever I read the book, I always feel the way I feel many years ago when I was still involved in pornography.

But I feel its normal, maybe my body is just reacting to what I am reading. And of course, body no be fire wood.

I laughed and said to him bro, stop deceiving yourself, because you're still very much involved in pornography... I asked him a question:

if a girl comes to you at that moment with the way you're feeling won't you have sex with her?

He said yes and is it not the same thing that happened to you many years ago that you lay with a girl only because she came into your room while you were watching pornography and because you were feeling aroused just the way it happened to you yesterday you slept with her? He said yes.

Same thing applies to the opposite sex and it can become lesbians and gays.... It starts from somewhere.

Many think they've stopped watching pornography but from what they hear and read they don't know they're still very much involved in pornography.

Things are upgrading every day, people now read it and create a picture and video in their head, with which they play with, without anyone seeing them or noticing.

Thank you for telling me this truth, I would share it with my friends. No problem and don't forget that pornography is a silent killer, I replied him.

Stop hearing that music or reading that book that create feelings that is equated to the feelings of watching pornography, God sees you. "SIN IS SIN"

Pornography the silent killer set for Jesus.....
